Office Action Summary

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 34 to 58, are drawn to doxycycline tetracycline disinfectant solution, classified in class 514, subclass 558.
- II. Claims 1 to 33 and 59, are drawn to methods for removing tooth surface smear layer, classified in class 433, subclass 215.

The inventions are distinct, each from the other because:

The doxycycline tetracycline disinfectant can be used for purposes other than Smear layer removal in dentistry, to disinfect utensils and prosthesis and other inanimate surfaces subject to infection contaminaton

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I , restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shep Rose whose telephone number is (703) 308-4609. The examiner can normally be reached on Monday, Tuesday, and Thursday 7:30am-6pm.
